

Elmo and the SMARTBoard

To use SMARTBoard to write on something from Elmo:

Plug USB from Elmo to laptop. Do not plug in black RGB cable to the wall.

Go to Start, Student's Menu, Elmo, Utility, Elmo Utility.

Press Power button to turn Elmo on.

Press PC button on Elmo.

On the toolbar for the Elmo Utility software, press the right facing arrow (the Start button).

From the tools menu you can choose a size for your window.

Put what you want to look at under the camera. Click on tools and still capture or the still capture icon on the tool bar.

Click on the Draw icon (or Tools, Draw).

You can now annotate the image on the SMARTBoard.
